What are the risks of investing?

Risk indicator for the Hunter Global Fixed Interest Fund.¹

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on a combination of actual and market index returns data for the 5 years to 31 March 2018. Notes

- ¹ A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility. Market index returns have been used for the period to 15 March 2017.
- ² The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
- ³ As the GST component of fund charges (such Supervisor and Manager fees) varies we have estimated GST using the estimated mix of underlying fund charges.
- ⁴ We have assumed there are no extraordinary expenses such as costs of any litigation or unitholder meetings.
